ITM SKILLS UNIVERSITY

🍴 *EventCater Pro*
Website Documentation 🍴

Student Name: Swanandi Mane
Course: Html,Css and Javascript
Roll Number: 150096765218
Case Study No: 91

📘 *Introduction:*

EventCater Pro is a responsive event catering management website developed using **HTML, CSS, and JavaScript**. The website allows users to explore catering services, view menus, check packages, and book catering services for events.

The system provides an easy and interactive interface for customers to browse catering options and make bookings online.

🎯 *Objectives:*

The main objectives of this project are:

- To design a **responsive catering management website**
- To allow users to **view catering menus and packages**
- To enable customers to **book catering services**
- To provide a **simple and user-friendly interface**
- To demonstrate the use of **HTML, CSS, and JavaScript in web development**

⌨️ *Technologies Used:*

Technology	Purpose
Html 5	Structure of website
Css	Styling and layout design
Javascript	Interactivity and functionality

📑 *Website Pages:*

The website consists of **five main pages**:

1. Home Page (index.html)

- Introduction to EventCater Pro
- Overview of catering services
- Navigation to other pages

2. Menu Page (menu.html)

- Displays available food items
- Shows different dishes offered by the catering service

3. Packages Page (packages.html)

- Displays catering packages
- Shows different pricing plans for events

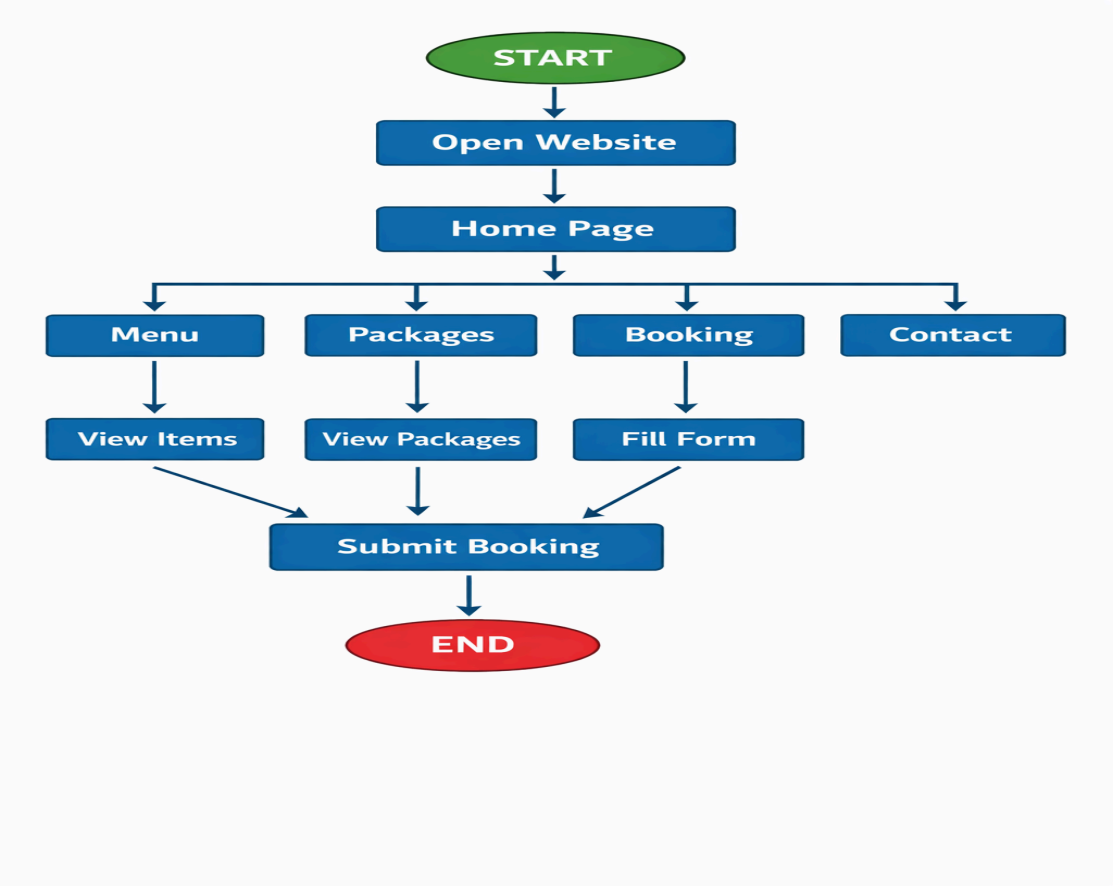
4. Booking Page (booking.html)

- Allows users to book catering services
- Users can select menu items and event details

5. Contact Page (contact.html)

- Provides contact details
- Allows users to send inquiries or messages

🔃 ***System Workflow:***

The website follows a simple workflow:


1. User visits the **Home Page**
2. User explores **Menu or Packages**
3. User selects catering options
4. User fills the **Booking Form**
5. Booking request is submitted
